DEVELOPER HANDOFF · FROM CALL SCRIPT V02

Roadside Quote App Screen Flow v1.0

One page per screen. Each page shows the phone wireframe on the left and, on the right, which screen follows each answer and how each answer changes the price.

How to read each page

Blue = next screen

Amber = price effect (keys from page 2)

Purple = hand-off to a person (page 20)

`KEY_NAME` = a value on the Price Parameters page. Never hardcode it.

Tow mileage is typed by the customer on W2. The pickup and drop-off addresses go to the dispatcher only. The app never calculates distance.

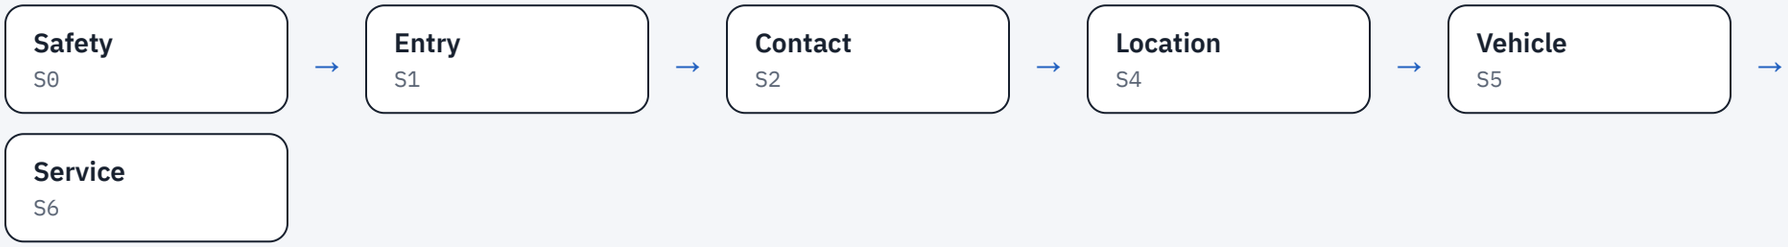

CONTENTS, IN FLOW ORDER

Page	Screen	Shown when
2	**Overview**	How the screens connect
3	**Price Parameters**	All prices and formulas
4	**S0 · Safety check**	First screen, every session
5	**S1 · Entry**	After S0
6	**S2 · Contact and phone check**	After S1, all request types
7	**S4 · Vehicle location**	New request, after S2
8	**S5 · Vehicle**	After S4, or after S2 for existing/cancel
9	**S6 · Service choice**	After S5, regular vehicle
10	**J1 · Jump start**	S6 = Jump start
11	**T1 · Flat tire**	S6 = Flat tire
12	**L1 · Lockout**	S6 = Locked out
13	**W1 · Tow pickup and drop-off**	S6 = Tow, or T1 = Just tow
14	**W2 · Tow miles and neutral**	After W1
15	**G1 · Out of gas**	S6 = Out of gas
16	**M1 · Mechanic check**	S6 = Mechanic check
17	**X1 · Winch-out**	S6 = Stuck
18	**S7 · Quote summary**	Last service screen complete
19	**S8A · Payment**	S7 = Accept and pay
20	**R · Hand-off to a person**	Any screen raises a reason code

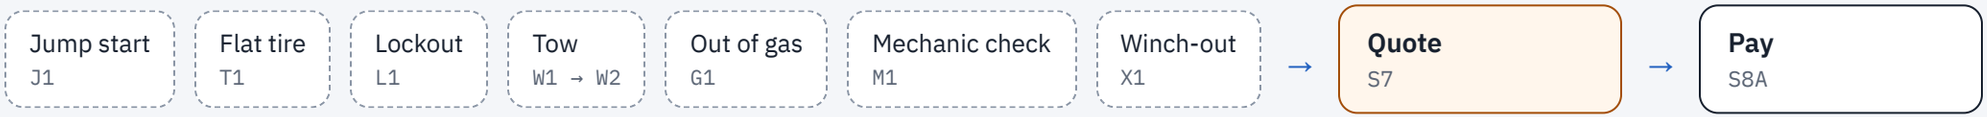

Every customer answers the same 6 screens, then one service path, then gets a quote.

Each board on this canvas is one screen: the phone wireframe on the left, and on the right which screen follows each answer and how each answer changes the price.

1 · COMMON SCREENS

2 · ONE SERVICE PATH, PICKED ON S6

Blue = next screen

Each board lists every answer and the screen it leads to. Edits on S7 jump back to that screen and recalculate.

Amber = price effect

Prices come only from the Price Parameters board. A formula names a key like `TOW_RATE_SHORT`, never a number.

Purple = hand-off (R)

From any screen, a case the app can't quote goes to a person. No price is shown. The reason code travels with the lead.

Tow mileage is typed by the customer.

W1 collects pickup and drop-off addresses for the dispatcher only. The miles that set the price come from the number the customer enters on W2. The app does not calculate distance.

PRICE TABLE V1.0 · THE ONLY PLACE VALUES LIVE

Change a value here and every quote follows; no screen or formula changes.

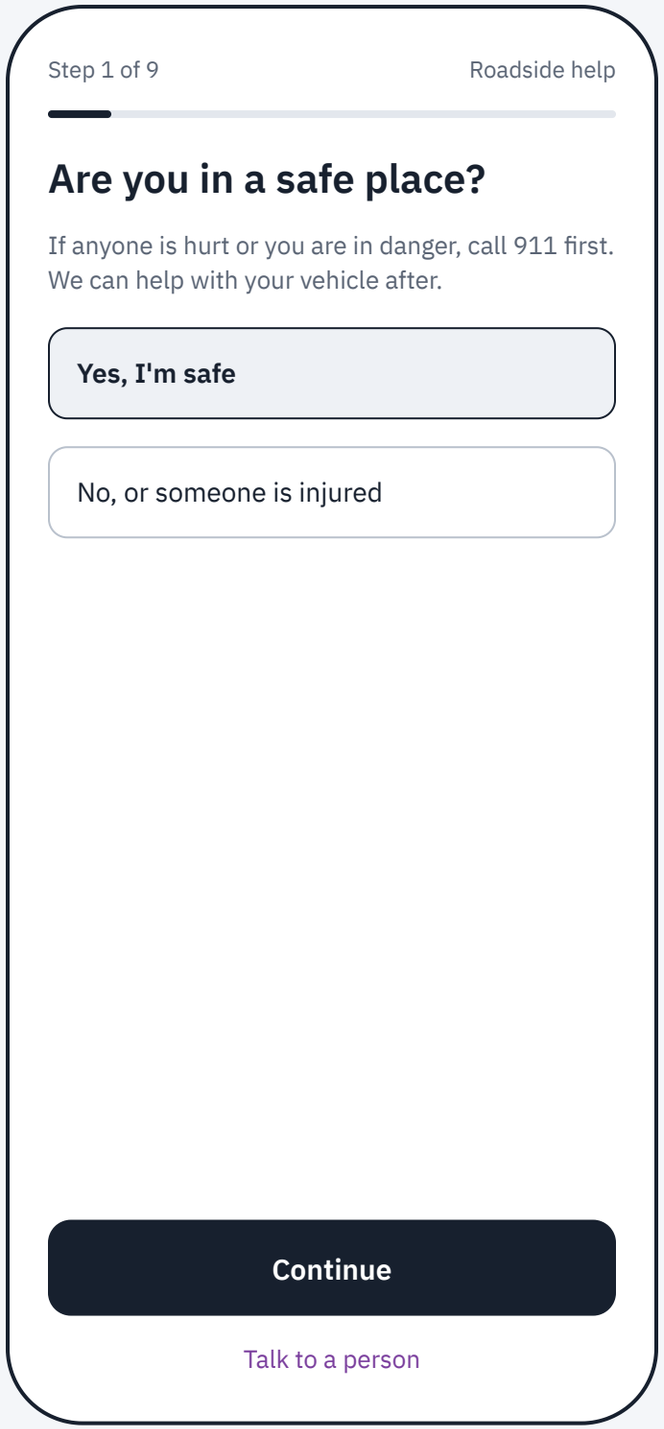

Day = DAY_START to DAY_END at the vehicle's local time. Every quote stores the table version it used. TBD = not defined in V02; default shown.

Key	Meaning	Value
Rules		
DAY_START	Day rate starts	07:00
DAY_END	Night rate starts (7:00 PM = night)	19:00
QUOTE_VALID_MIN	Recalculate quote after TBD	30 min
ROUNDING	Miles and feet round up	ceil
Jump start		
JS_1_DAY	1 battery, day	$150
JS_1_NIGHT	1 battery, night	$200
JS_2	2 batteries, any time TBD	$229
JS_3	3 batteries, any time TBD	$265
JS_4	4 batteries, any time TBD	$295
JS_MAX_BATTERIES	More → hand-off	4
Tire, lockout, mechanic		
TIRE_DAY	Change or replacement, day	$165
TIRE_NIGHT	Change or replacement, night	$200
LOCKOUT_DAY	Lockout, day	$150
LOCKOUT_NIGHT	Lockout, night	$200
MECH_DAY	Assessment, day	$150
MECH_NIGHT	Assessment, night	$300

Key	Meaning	Value
Towing (miles typed by customer on W2)		
TOW_HOOK_NEUTRAL_OK	Hook fee, neutral works	$169
TOW_HOOK_NEUTRAL_FAIL	Hook fee, no or not sure	$189
TOW_RATE_SHORT	Per mile, trip ≤ threshold	$8/mi
TOW_RATE_LONG	Per mile, trip > threshold	$10/mi
TOW_THRESHOLD_MI	Short/long cut-off TBD	20 mi
TOW_MAX_MI	Longer → hand-off TBD	100 mi
Gas delivery		
GAS_BASE	Base fee	$199
GAS_PRICE_PER_GAL	Fuel price charged TBD	$4.00/gal
GAS_INCLUDED_MI	Delivery miles in base	5 mi
GAS_RATE_PER_MI	Per delivery mile after that	$5/mi
Winch-out		
WINCH_BASE	Fixed fee	$285
WINCH_INCLUDED_FT	Feet from pavement in base	10 ft
WINCH_STEP_FT	Size of each extra step	10 ft
WINCH_STEP_PRICE	Price per extra step	$100

FORMULAS (READ KEYS, NEVER NUMBERS)

```
period         = DAY_START ≤ local_time < DAY_END ? DAY : NIGHT     rate(X) = X_DAY or X_NIGHT
Jump start     = n = 1 ? rate(JS_1) : JS_n                            n > JS_MAX_BATTERIES → hand-off
Tire change    = rate(TIRE)              Tire replacement = rate(TIRE) + cost of tire (set by dispatcher)
Lockout        = rate(LOCKOUT)           Mechanic check   = rate(MECH)
Tow            = hook + ceil(miles_typed) × (ceil(miles_typed) ≤ TOW_THRESHOLD_MI ? TOW_RATE_SHORT : TOW_RATE_LONG)
                 hook = neutral = yes ? TOW_HOOK_NEUTRAL_OK : TOW_HOOK_NEUTRAL_FAIL
Gas            = GAS_BASE + gallons × GAS_PRICE_PER_GAL  (+ GAS_RATE_PER_MI per delivery mile over GAS_INCLUDED_MI, confirmed by dispatcher)
Winch-out      = WINCH_BASE + max(0, ceil((feet − WINCH_INCLUDED_FT) / WINCH_STEP_FT)) × WINCH_STEP_PRICE
```

S0 · SAFETY

Safety check

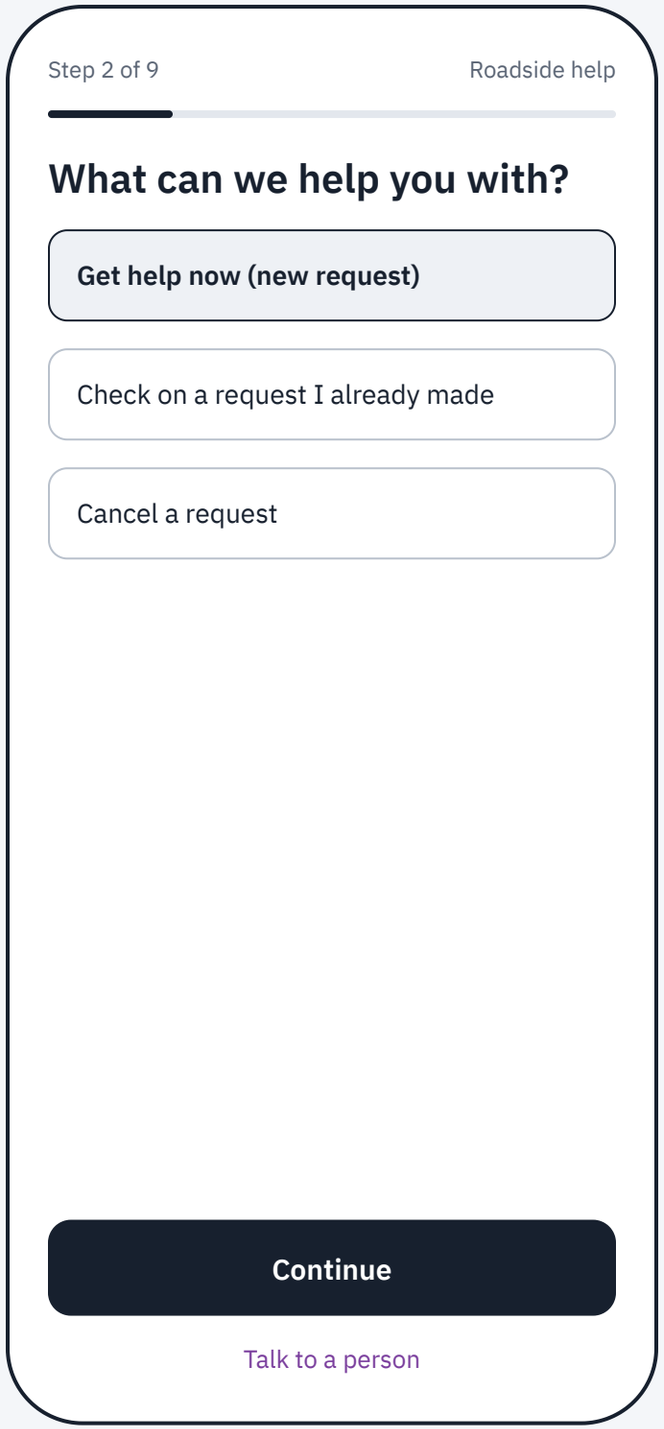

Shown when: first screen of every session.

ANSWER → NEXT SCREEN

Answer	Next
Yes, I'm safe	**S1 · Entry**
No, or someone is injured	**911 notice** with "Call 911" and "I'm safe now"; then **S1 · Entry**
Talk to a person (on every screen)	**R · USER_REQUEST**

ANSWER → PRICE

No price effect. This screen is a safety step only and is not stored on the quote.

S1 · ENTRY

Entry

Shown when: after S0. Sets `request_type` = new, existing or cancel.

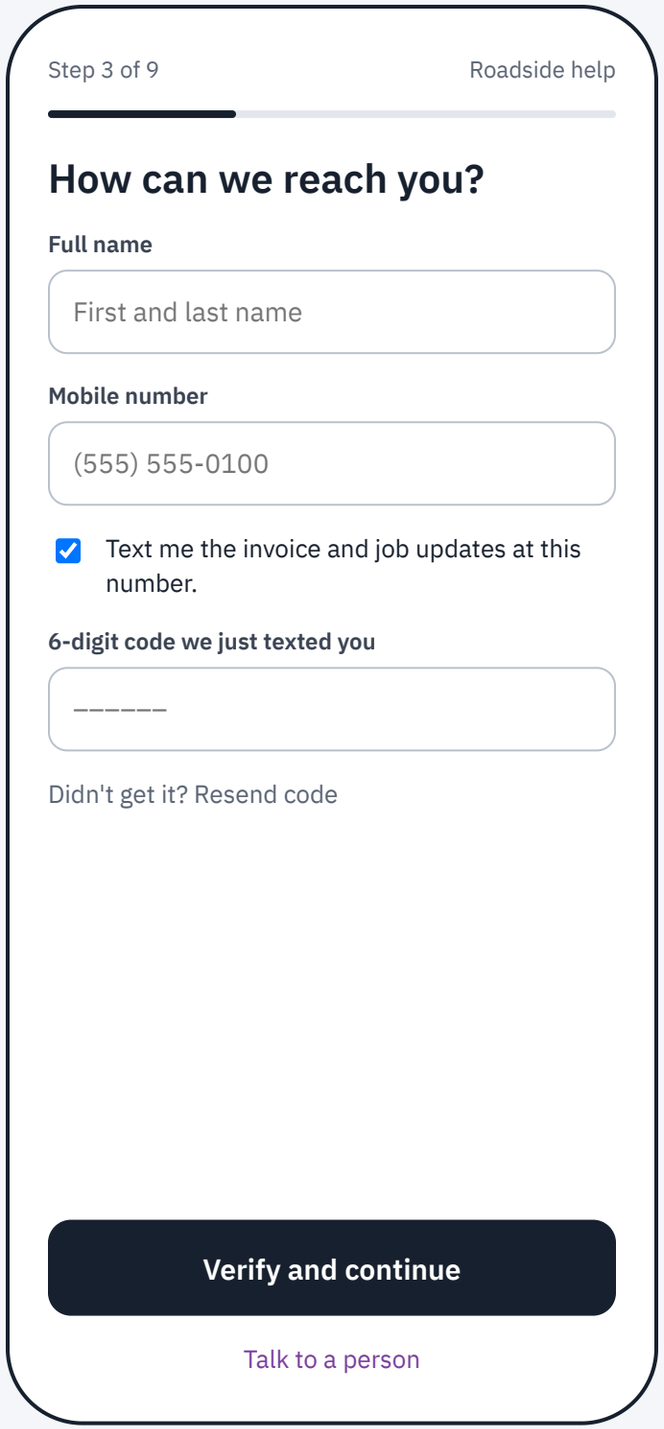

ANSWER → NEXT SCREEN

Answer	Next
Get help now	**S2 · Contact → full path**
Check on a request I already made	**S2 · Contact** → **S5 · Vehicle** (year, make, model) → **R · EXISTING_JOB**: "The agent handling your job will contact you shortly."
Cancel a request	**S2 · Contact** → **S5 · Vehicle** → **R · CANCEL_JOB**: "The agent will contact you about cancellation and refund options."

Existing and cancel requests skip location, service and quote. Phone and vehicle are enough for the dispatcher to find the job.

ANSWER → PRICE

No price effect. Only "new request" leads to a quote.

S2 · CONTACT

Contact and phone check

Shown when: after S1, for every request type. The code field appears after a valid number is entered.

FIELDS AND CHECKS

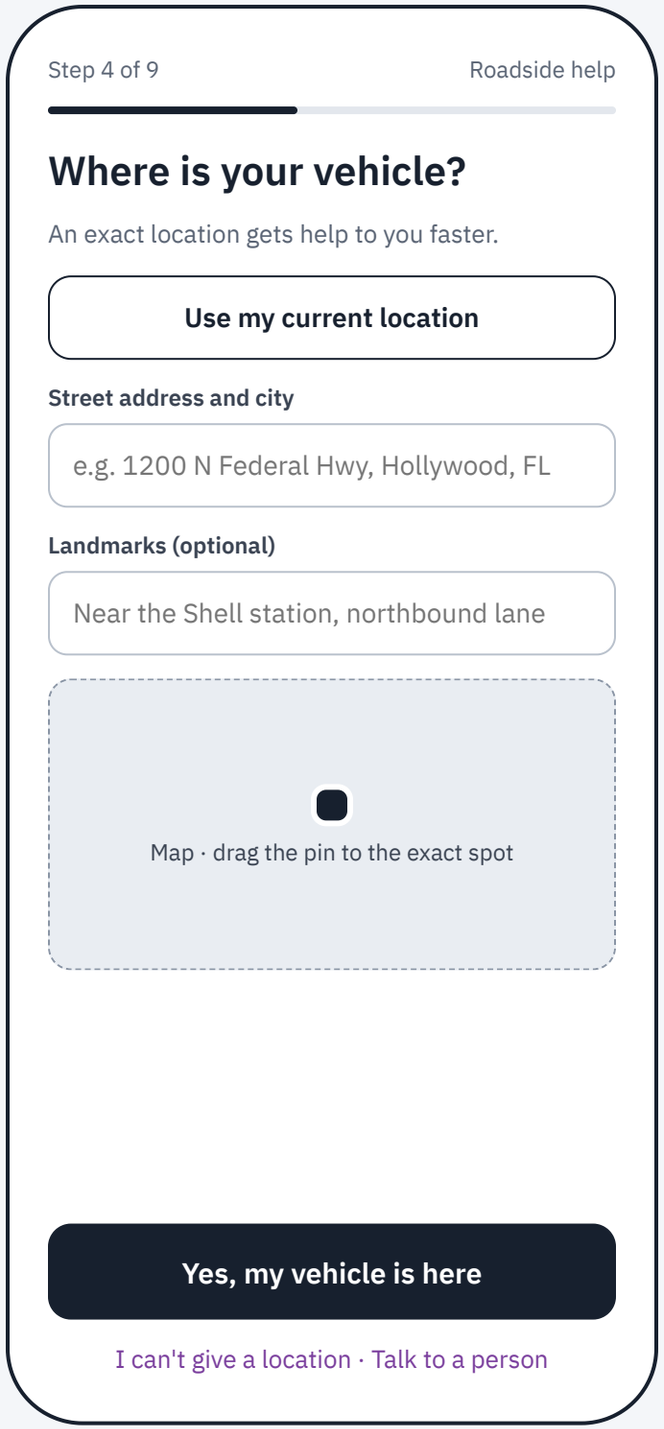

Field	Rule
Full name	At least two words. Used to greet the customer on later screens.
Mobile number	Valid US mobile number. Invoice and dispatcher calls go here.
Text consent	Required to send the invoice by text (V02 step 10).
6-digit code	Must match the code sent by SMS. 3 tries.

ANSWER → NEXT SCREEN

Answer	Next
Code verified, new request	**S4 · Location**
Code verified, existing or cancel	**S5 · Vehicle**
Code fails 3 times	**R · MISSING_INFO**

ANSWER → PRICE

No price effect.

S4 · LOCATION (includes S4A, pin confirmation)

Vehicle location

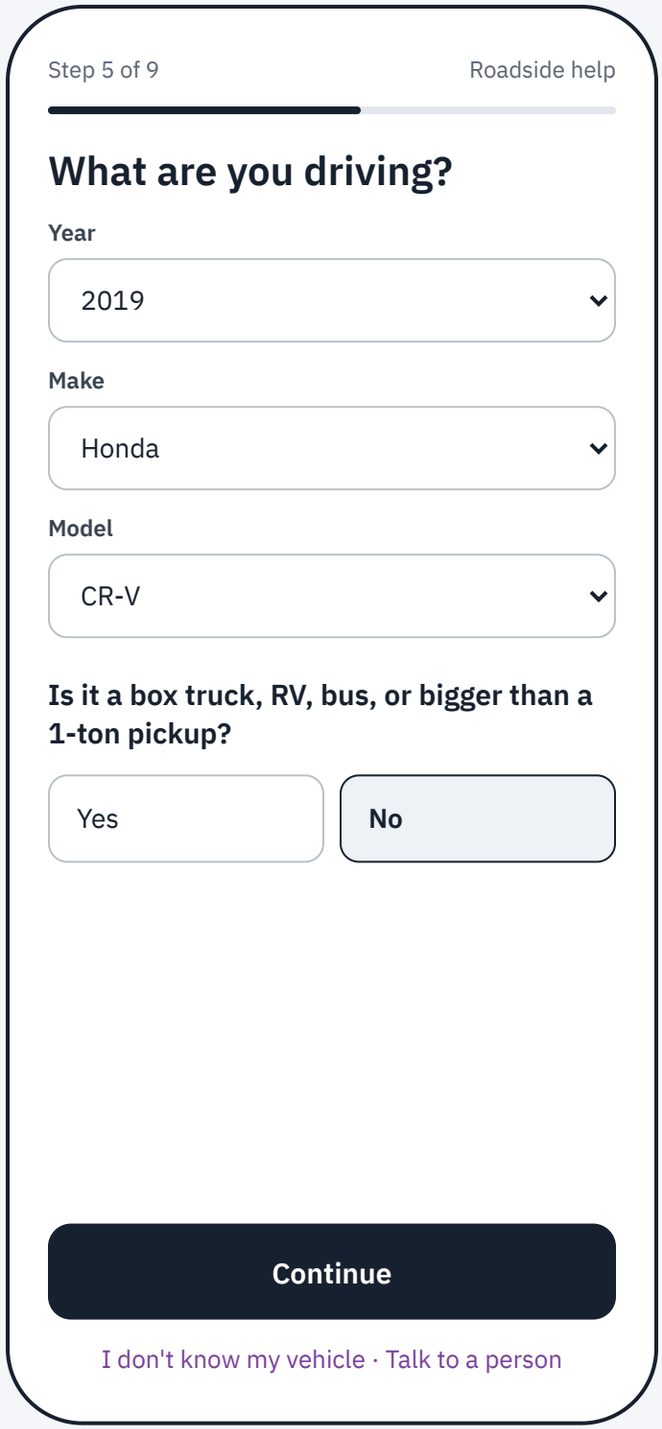

Shown when: new request, after S2. Replaces the script's "repeat the location back" step with a map pin the customer confirms.

ANSWER → NEXT SCREEN

Answer	Next
Address found and pin confirmed	**S5 · Vehicle**
Address not found	Stay on S4: "We couldn't find that address. Add the city or a cross street."
Pin moved	Address updates from the pin; customer confirms again
I can't give a location	**R · MISSING_INFO**

ANSWER → PRICE

Effect	Rule
Day or night rate	The pin sets the vehicle's time zone. Local time between `DAY_START` and `DAY_END` = day rate, otherwise night.
Tow pickup	Becomes the default pickup address on W1. It does not set tow miles.

S5 · VEHICLE (includes S5A, size check)

Vehicle

Shown when: after S4 (new request) or after S2 (existing or cancel). The size question replaces V02's live weight search: anything over 10,000 lbs goes to the heavy-duty team.

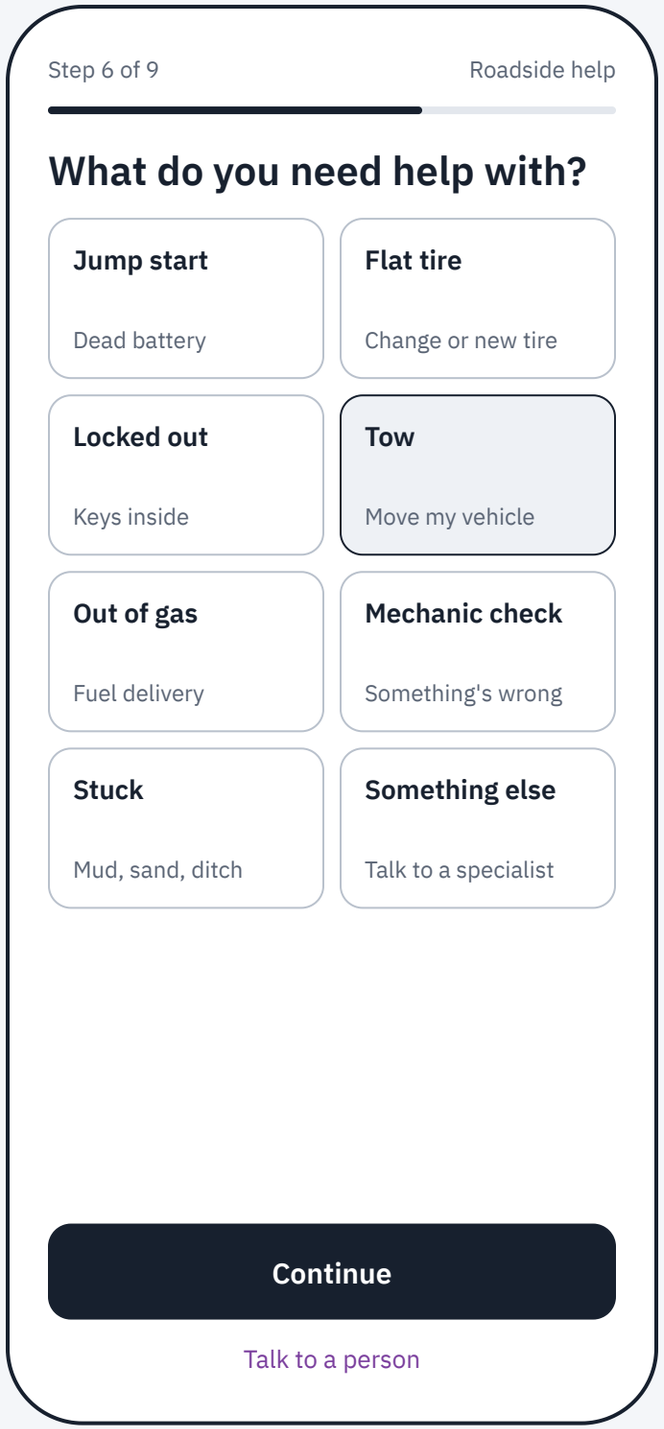

ANSWER → NEXT SCREEN

Answer	Next
Year, make, model filled · size = No · new request	S6 · Service
Size = Yes	R · HEAVY_DUTY
Existing request	R · EXISTING_JOB
Cancel request	R · CANCEL_JOB
I don't know my vehicle	R · MISSING_INFO

Optional for the developer: a VIN or make/model lookup that returns vehicle weight can answer the size question automatically.

ANSWER → PRICE

No price effect for regular vehicles. Heavy-duty vehicles are never quoted in the app.

S6 · SERVICE

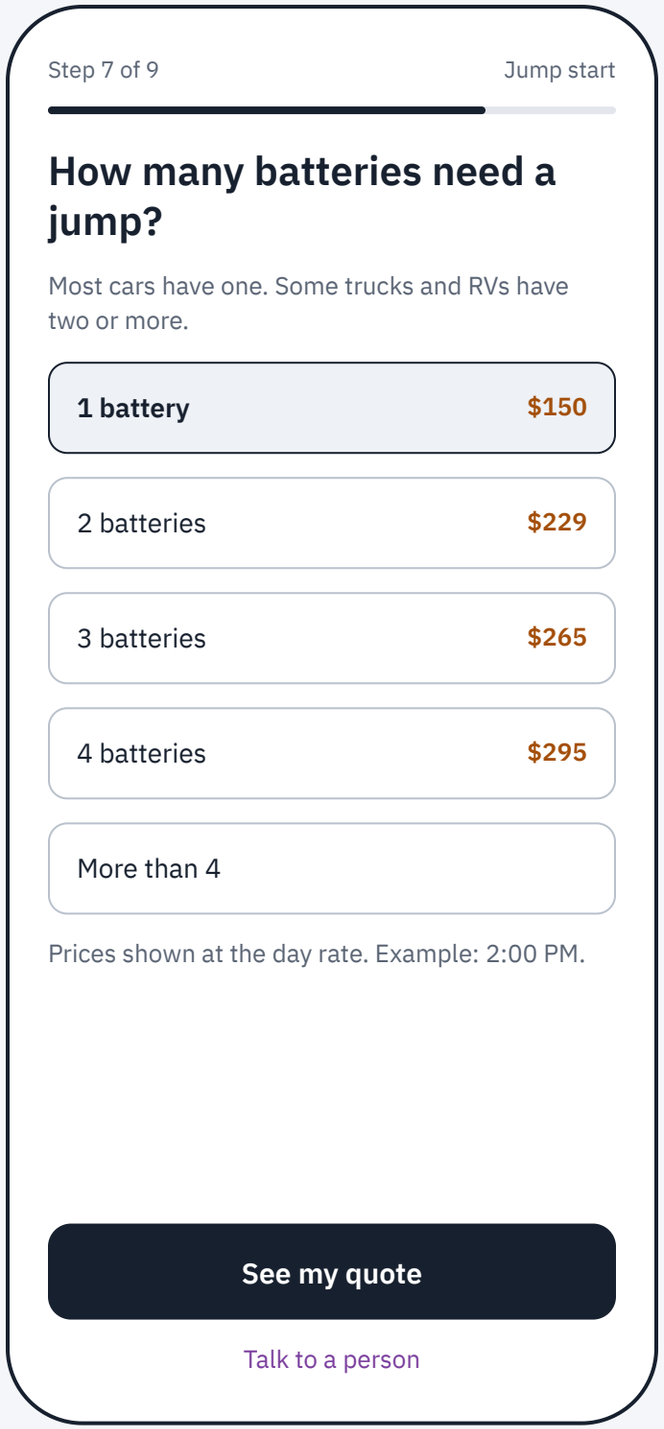

Service choice

Shown when: after S5, new request, regular vehicle. One choice; it decides which question screen comes next and which formula prices the job.

ANSWER → NEXT SCREEN → PRICE FORMULA

Answer	Next	Formula (keys on Prices board)
Jump start	J1	rate(JS_1) or JS_n
Flat tire	T1	rate(TIRE), + tire, or tow
Locked out	L1	rate(LOCKOUT)
Tow	W1 → W2	hook + miles × tow rate
Out of gas	G1	GAS_BASE + fuel
Mechanic check	M1	rate(MECH)
Stuck (winch-out)	X1	WINCH_BASE + steps
Something else	R · UNLISTED_SERVICE	Not quoted

`rate(X)` = `X_DAY` or `X_NIGHT`, chosen by the vehicle's local time (from S4).

J1 · JUMP START

Jump start

Shown when: S6 = Jump start. Sets `battery_count`.

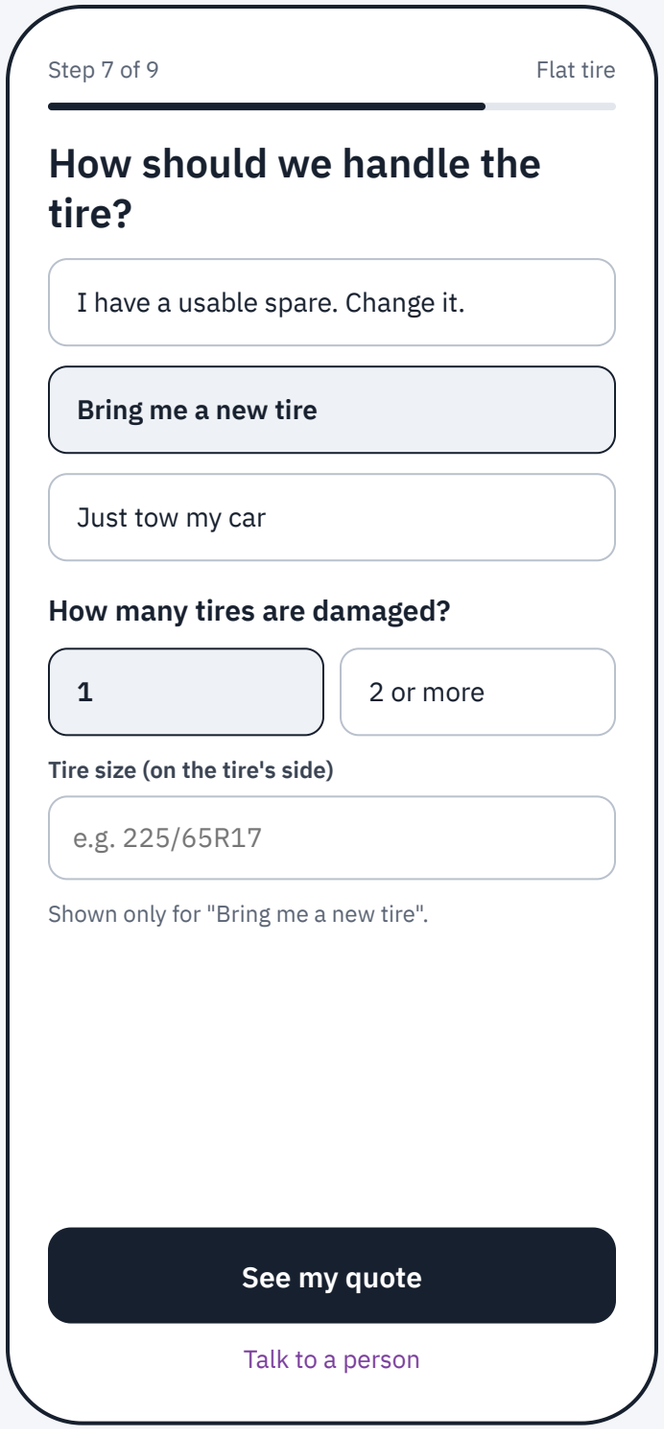

ANSWER → NEXT SCREEN

Answer	Next
1 to `JS_MAX_BATTERIES` (4)	**S7 · Quote**
More than 4	**R · OVER_LIMIT**

ANSWER → PRICE

Answer	Key	Day	Night
1 battery	`JS_1_DAY` / `JS_1_NIGHT`	**$150**	**$200**
2 batteries	`JS_2`	**$229**	**$229**
3 batteries	`JS_3`	**$265**	**$265**
4 batteries	`JS_4`	**$295**	**$295**

V02 gives no night price for 2–4 batteries, so the same price applies day and night until you decide otherwise.

T1 · FLAT TIRE (V02 III.A)

Flat tire

Shown when: S6 = Flat tire. The first answer decides the real service: tire change, tire replacement, or tow.

ANSWER → NEXT SCREEN

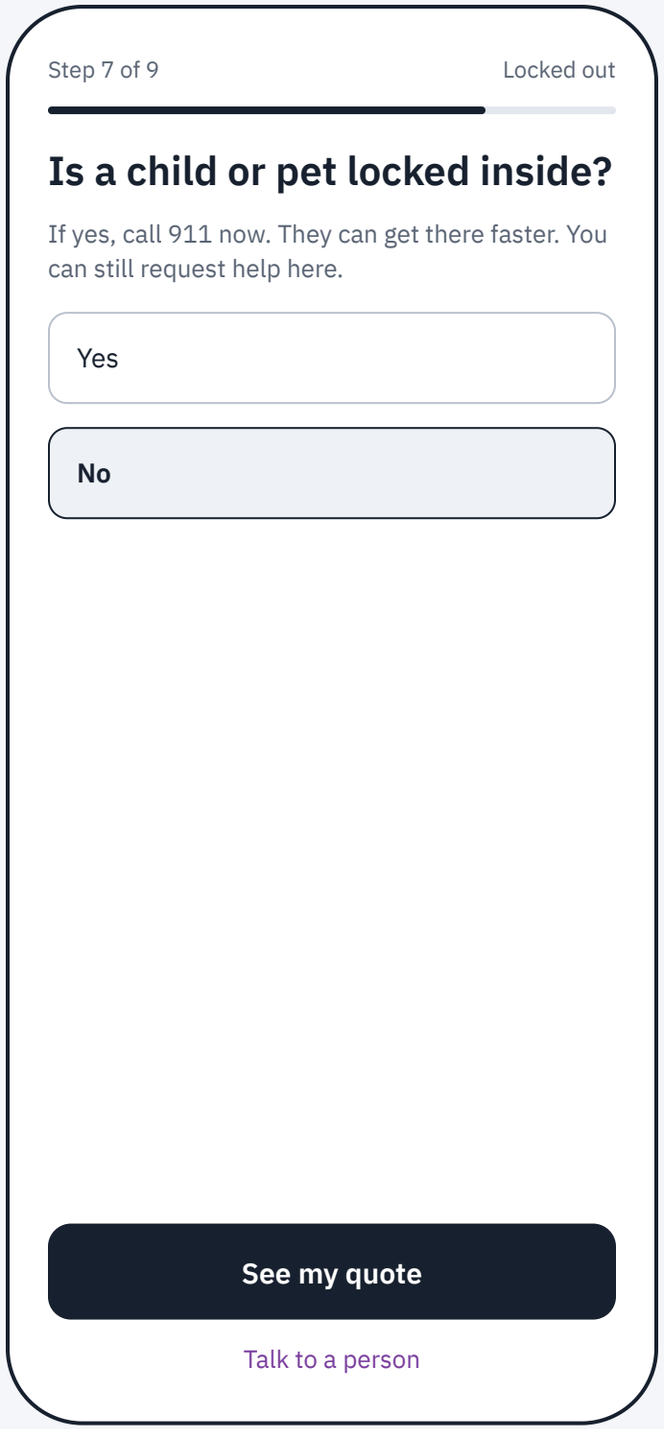

Answers	Service set	Next
Spare + 1 tire	tire_change	**S7 · Quote**
New tire + 1 tire	tire_replace	**S7 · Quote**
Spare or new + 2 or more	—	**R · OVER_LIMIT**
Just tow my car	tow	**W1 · Tow addresses**

"How many tires" is hidden when the customer picks tow.

ANSWER → PRICE

Service	Formula	Day	Night
Tire change	`rate(TIRE)`	**$165**	**$200**
Tire replacement	`rate(TIRE)` + cost of tire	**$165 + tire**	**$200 + tire**
Tow	Tow formula on W2	Priced on W2	

The app never prices the tire itself. The quote shows "+ cost of tire, confirmed by the dispatcher", who uses the tire size.

L1 · LOCKOUT

Lockout

Shown when: S6 = Locked out. A safety question only; the service and price are fixed.

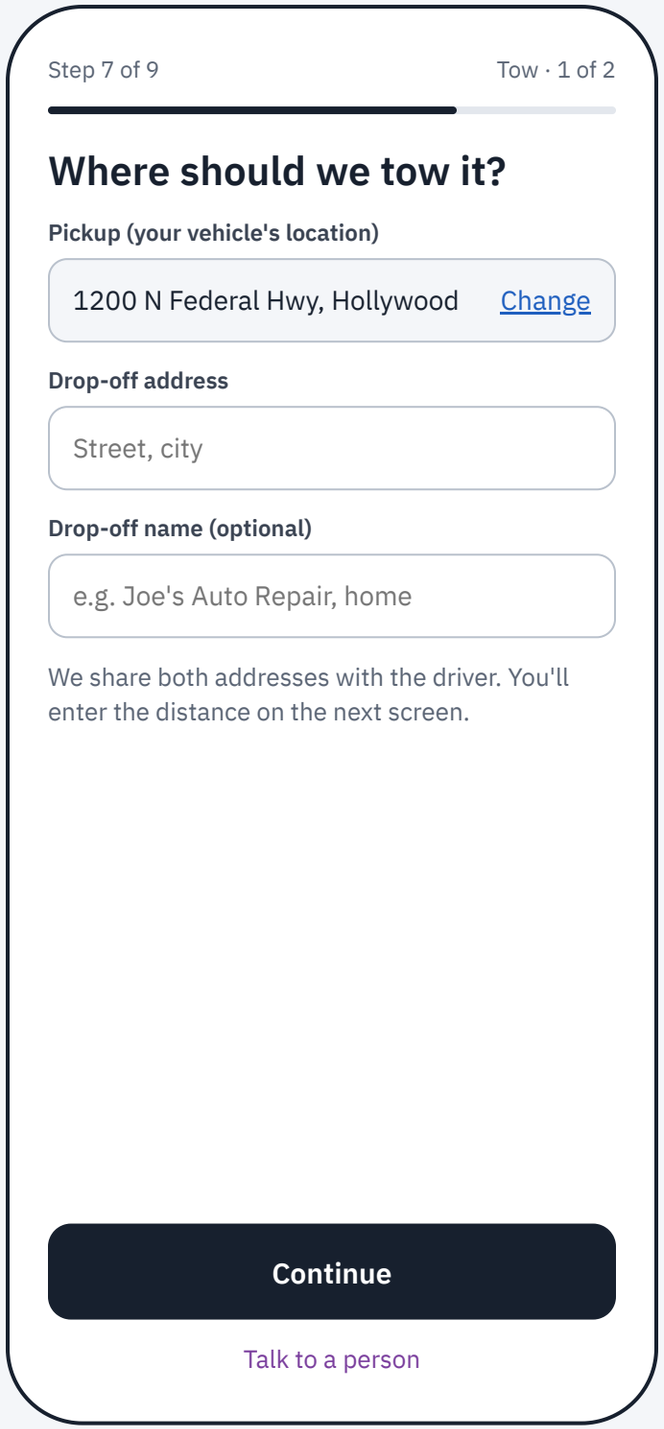

ANSWER → NEXT SCREEN

Answer	Next
No	**S7 · Quote**
Yes	**911 notice** ("Call 911" / "Continue"), then **S7 · Quote**. Flag the job as urgent for the dispatcher.

ANSWER → PRICE

Answer	Formula	Day	Night
Either	`rate(LOCKOUT)`	**$150**	**$200**

The answer does not change the price.

W1 · TOW ADDRESSES

Tow pickup and drop-off

Shown when: S6 = Tow, or T1 = "Just tow my car". Pickup is prefilled from S4 and can be changed.

ANSWER → NEXT SCREEN

Answer	Next
Drop-off address entered	**W2 · Tow miles and neutral**
Drop-off empty	Stay on W1: "Enter where you want the vehicle towed."
Pickup changed	Back to **S4** to confirm the new pin, then return here

ANSWER → PRICE

No price effect. The addresses go to the dispatcher and driver only. The app does not calculate the distance between them. Tow miles come from the number the customer types on W2.

Step 7 of 9 Tow · 2 of 2

How many miles from pickup to drop-off?

12.5 miles

Your best estimate. Check your maps app if you're not sure. The driver confirms the final mileage.

Can the car be put in neutral?

- **Yes**
- No
- Not sure

Tow estimate **$273.00**

See my quote

Talk to a person

W2 · TOW MILES AND NEUTRAL

Tow miles and neutral

Shown when: after W1. **Tow miles come only from the number the customer types here.** The app does not calculate them from the addresses.

ANSWER → NEXT SCREEN

Answer	Next
Miles > 0 and ≤ `TOW_MAX_MI` (100), neutral answered	**S7 · Quote**
Miles empty, 0 or not a number	Stay: "Enter the distance in miles."
Miles > `TOW_MAX_MI`	**R · OVER_LIMIT**

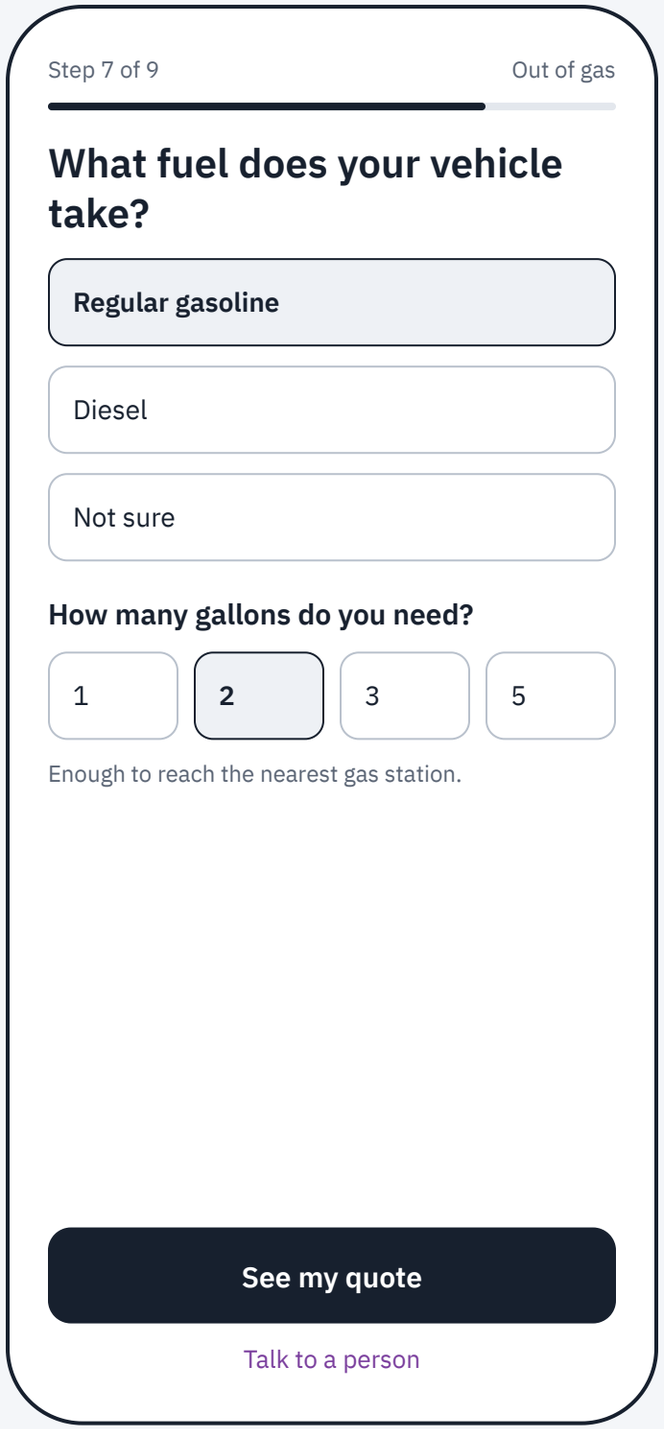

ANSWER → PRICE

```
miles  = round up (miles typed)        12.5 → 13
rate   = miles ≤ TOW_THRESHOLD_MI ? TOW_RATE_SHORT : TOW_RATE_LONG
hook   = neutral = Yes ? TOW_HOOK_NEUTRAL_OK : TOW_HOOK_NEUTRAL_FAIL
total  = hook + miles × rate
```

Neutral	Hook fee
Yes	**$169**
No	**$189**
Not sure	**$189**

Miles (rounded up)	Rate
1–20	**$8/mi, all miles**
21–100	**$10/mi, all miles**
Over 100	Hand-off

Customer types	Neutral	Calculation	Total
12.5 mi	Yes	$169 + 13 × $8	**$273.00**
20 mi	Yes	$169 + 20 × $8	**$329.00**
20.2 mi	Yes	$169 + 21 × $10	**$379.00**
34 mi	Not sure	$189 + 34 × $10	**$529.00**

G1 · OUT OF GAS

Out of gas

Shown when: S6 = Out of gas. The gallons question appears once a fuel type is chosen.

ANSWER → NEXT SCREEN

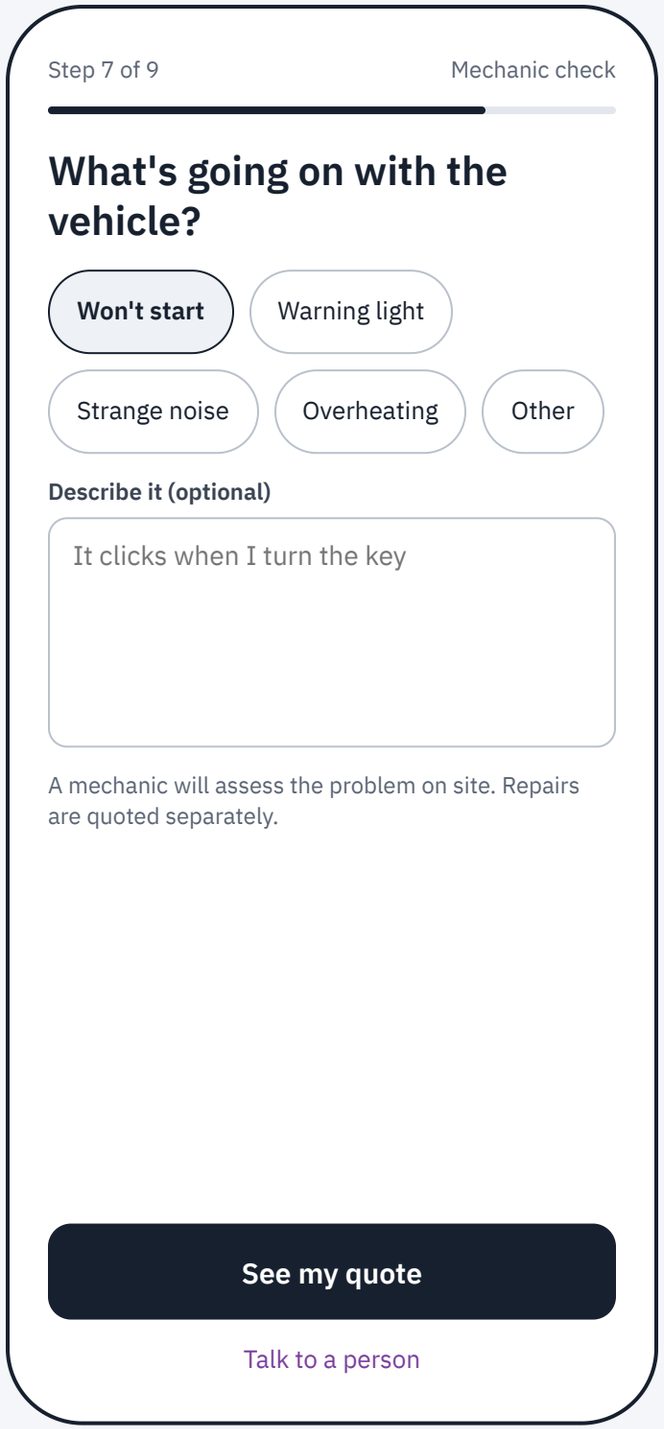

Answer	Next
Regular gasoline + gallons	**S7 · Quote**
Diesel	**R · UNLISTED_SERVICE**
Not sure	**R · UNLISTED_SERVICE**

ANSWER → PRICE

```
total = GAS_BASE + gallons × GAS_PRICE_PER_GAL
        + GAS_RATE_PER_MI per delivery mile over GAS_INCLUDED_MI (confirmed by dispatcher)
```

Gallons	Calculation	Quoted
1	$199 + 1 × $4.00	**$203.00**
2	$199 + 2 × $4.00	**$207.00**
3	$199 + 3 × $4.00	**$211.00**
5	$199 + 5 × $4.00	**$219.00**

The customer can't know how far the gas has to travel, so the quote shows "+ $5 per mile beyond the first 5 delivery miles, confirmed by the dispatcher". Same price day and night.

M1 · MECHANIC CHECK

Mechanic check

Shown when: S6 = Mechanic check. Answers are notes for the mechanic.

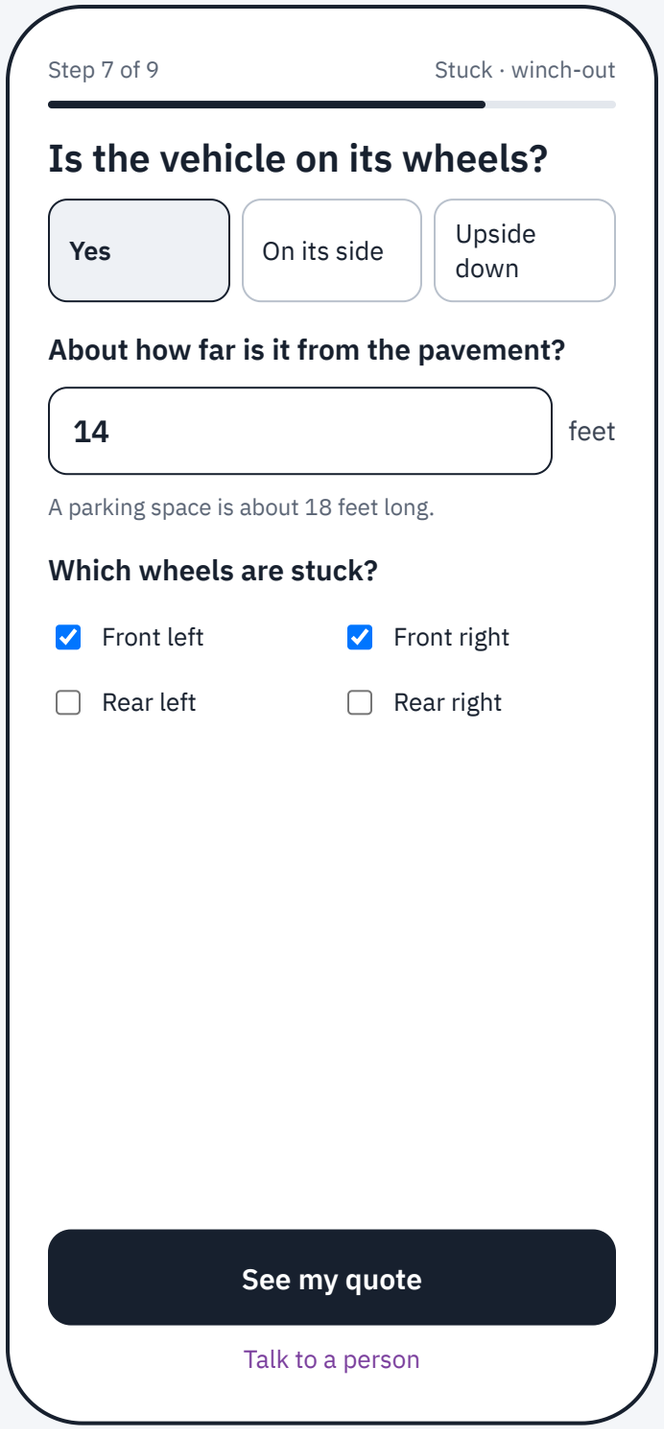

ANSWER → NEXT SCREEN

Answer	Next
Any choice, text optional	**S7 · Quote**

ANSWER → PRICE

Answer	Formula	Day	Night
Any	`rate(MECH)`	**$150**	**$300**

The answers do not change the price. The fee covers the assessment only.

X1 · WINCH-OUT (V02 III.G)

Winch-out

Shown when: S6 = Stuck. Distance questions appear only when the vehicle is on its wheels.

ANSWER → NEXT SCREEN

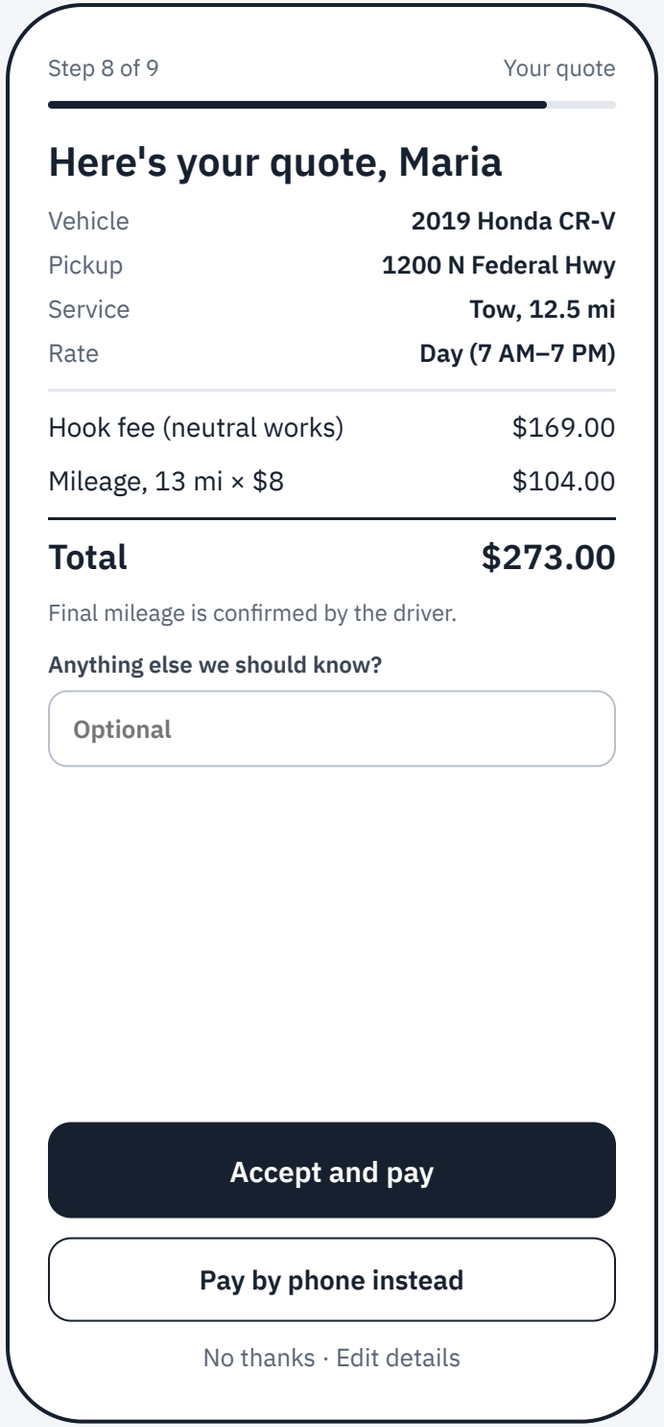

Answer	Next
On its wheels + distance entered	**S7 · Quote**
On its side or upside down	**R · WINCH_SPECIALIST**
Distance empty	Stay: "Enter an estimate in feet."

ANSWER → PRICE

```
steps = max(0, round up((feet − WINCH_INCLUDED_FT) ÷ WINCH_STEP_FT))
total = WINCH_BASE + steps × WINCH_STEP_PRICE
```

Feet from pavement	Extra steps	Total
0–10	0	**$285**
11–20	1	**$385**
21–30	2	**$485**
Each extra 10 ft	+1	**+$100**

Stuck wheels are passed to the driver and do not change the price. Same price day and night.

S7 · QUOTE SUMMARY

Quote summary

Shown when: the last service screen is complete. Replaces V02 steps 7–9. Example shown: tow, day rate.

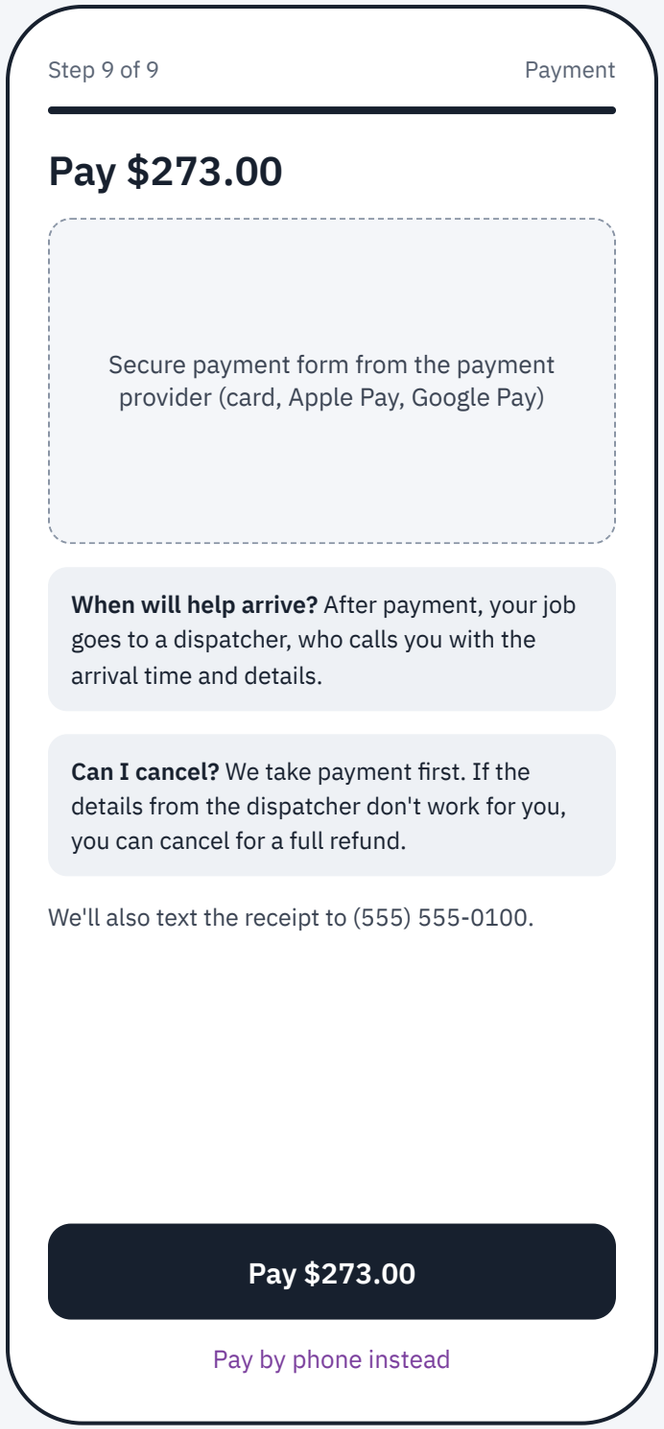

ANSWER → NEXT SCREEN

Action	Next
Accept and pay	**S8A · Payment**
Pay by phone instead	**R · PAY_BY_PHONE**
No thanks	**Thank-you screen**: "Thanks for checking with us. Come back any time." Quote saved as declined.
Edit details (tap any row)	That screen, then back here with a new total
Open longer than `QUOTE_VALID_MIN`	Recalculate and show the new total before payment

ANSWER → PRICE: LINE ITEMS BY SERVICE

Service	Line items shown
Jump, lockout, mechanic, tire change	**One service fee, day or night**
Tire replacement	**Service fee + "cost of tire, confirmed by dispatcher"**
Tow	**Hook fee + mileage (miles typed × rate)**
Gas	**Base + fuel + "delivery miles over 5 at $5/mi, confirmed by dispatcher"**
Winch-out	**Base + extra distance steps**

The quote stores its line items, total, day/night period and price table version.

S8A · PAYMENT (V02 step 10)

Payment

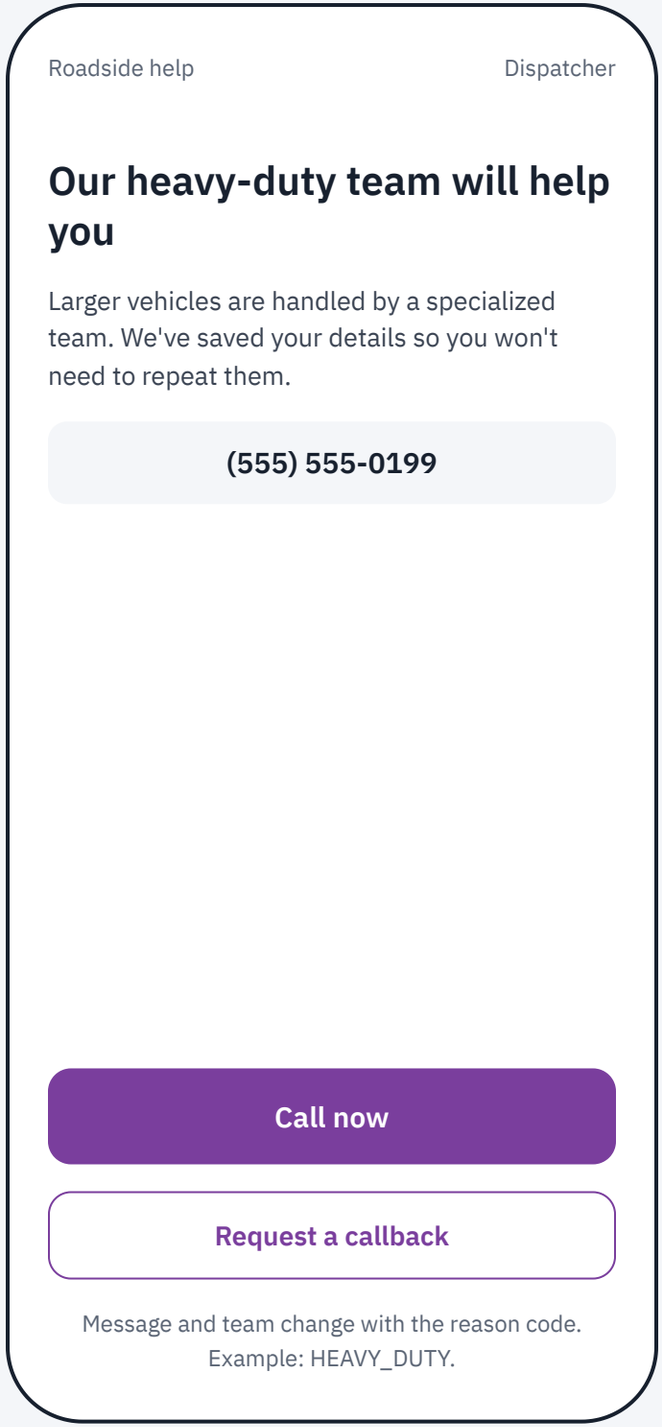

Shown when: S7 = Accept and pay. The ETA and refund texts are config strings (`MSG_ETA` , `MSG_REFUND`), editable without code changes.

ANSWER → NEXT SCREEN

Result	Next
Payment succeeds	**Confirmation screen**: "Paid. A dispatcher will call you shortly to confirm the arrival time." Order created, dispatcher notified, receipt texted.
Payment fails	Stay: card error from provider, try again
Pay by phone instead	**R · PAY_BY_PHONE**

ANSWER → PRICE

Charges the S7 total exactly. Items marked "confirmed by dispatcher" (tire cost, gas delivery miles, any tow mileage difference) are charged separately after the dispatcher confirms them.

R · HAND-OFF TO A PERSON (V02 transfer rules)

Hand-off to a person

Shown when: any screen raises a reason code. The app stops, saves everything collected as a lead with the code, and offers a call or callback.

Code	Raised on	Headline shown	Team
USER_REQUEST	Any screen	A dispatcher will help you	Dispatcher
EXISTING_JOB	S1 → S5	The agent on your job will contact you shortly	Job owner
CANCEL_JOB	S1 → S5	We'll call you about cancellation and refund options	Job owner
MISSING_INFO	S2, S4, S5	A dispatcher will help you finish your request	Dispatcher
HEAVY_DUTY	S5	Our heavy-duty team will help you	Heavy-duty team
UNLISTED_SERVICE	S6, G1	Our specialist team handles this service	Specialist
WINCH_SPECIALIST	X1	A specialist will call you back shortly	Specialist (callback only)
OVER_LIMIT	J1, T1, W2	A dispatcher will confirm this job with you	Dispatcher
PAY_BY_PHONE	S7, S8A	An agent will take your payment by phone	Dispatcher

ANSWER → PRICE

No price is shown for any hand-off. For PAY_BY_PHONE the quoted total is passed to the agent with the lead.
